

FINANCIAL ALGEBRA 2E

PATHWAYS

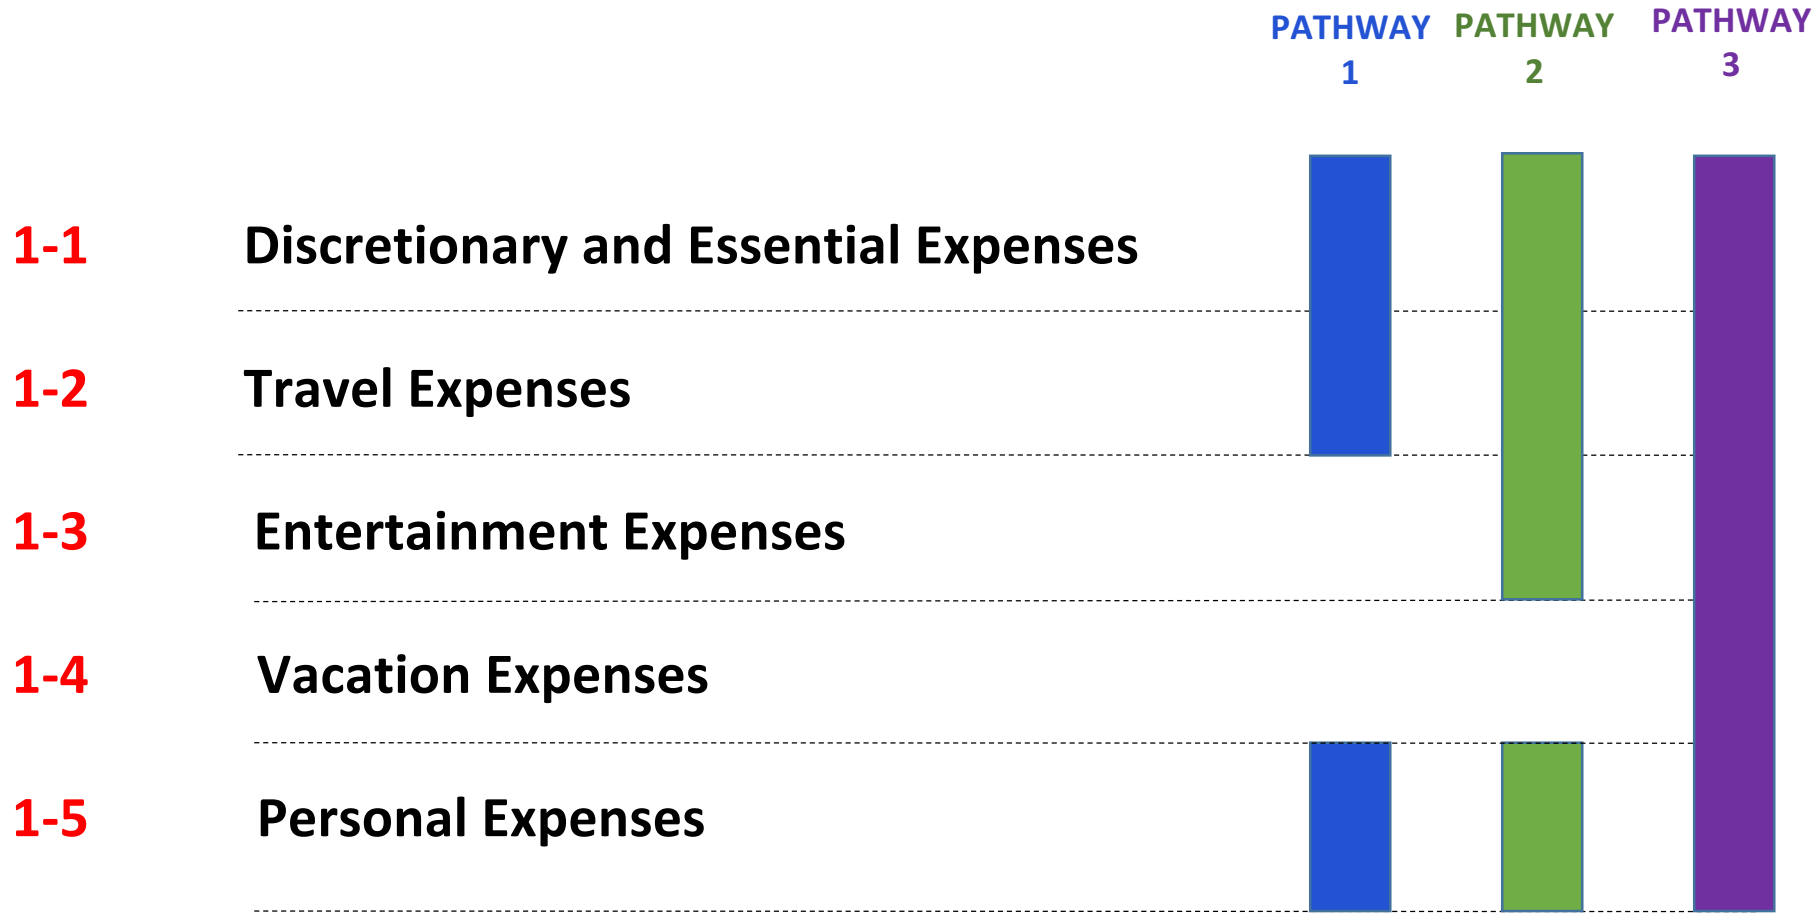

A NOTE FROM THE AUTHORS

This document outlines sample pathways for designing a full-year mathematics course using *Financial Algebra 2E*. We offer three possible pathways that increase in level and amount of coverage as you go from blue to green to purple paths.

In addition to the full year implementation of the course, some schools have chosen to cover Chapters 1-6 in *Financial Algebra 2E* during the Spring semester as part of their senior-year math class.

A mathematics course that utilizes *Financial Algebra 2E* is rich in both mathematical and financial topics. You should feel free to create your own pathway by choosing chapters and sections that work best for your students.
